I am a full stack developer with experience in performing software testing and building responsive and intuitive web applications. Armed with in-depth understanding of front end and back-end development, my passion lies in creating user friendly, mobile first applications. Key strengths include logical thinking, my ability to analyse/troubleshoot issues and curiosity to learn.

Technical Skills

Front End

HTML5, CSS3, JavaScript, React, GraphQL, jQuery, Bootstrap, RESTful API

Back End

NodeJS, Express.js, NPM, OOP, JSON, SQL, MongoDB

Applications

GitHub, JIRA, Neto

Methodologies

Agile, Waterfall

Education

Full Stack Development Bootcamp	Monash University	2022
Bachelor of Computer Science Engineering	Anna University	2010

Projects

Tech Hub

A full stack application for users to ask and answer questions with authentication and database connections.

- Tech used - React, Nodejs, Express, MongoDB, GraphQL, Apollo Client, Chakra UI

Hawaiki Shop

A full stack E-commerce application for users to purchase business merchandise with authentication and database connections.

- Tech used - Nodejs, Express, Sequelize, Handlebars, Javascript, JQuery, mysql2, Izimodal

Coffee Mate!

The Coffee Morning App is designed for the user view during their morning coffee for their daily dose of internet goodness.

- Tech used - HTML, CSS, JavaScript, Moment.js, Third party APIs

Experience

2021(May) – Present Boutique Retailer Content Creator/Front-end Developer

Currently working for the marketplace, creating product content to list on different channels and maintaining the product values and related activities in Maropost Commerce Cloud while learning the complexity of ecommerce behaviour.

My key responsibilities include automating redundant tasks and creating micro apps inside the master application to suit business needs.

2010-2012 Cognizant Technology Solutions Test Analyst

Planned and executed testing activities in Test management tool, HP Quality Center. Developed test scenarios and detailed test cases based on business requirements. Logged and tracked the bugs in defect tracking tool, JIRA till closure. Performed tests for unit functionality, end to end, system integration and backend.
