Portfolio || GitHub || LinkedIn

I am a full stack developer with experience in performing software testing and building responsive and intuitive web applications. Armed with in-depth understanding of front end and back-end development, my passion lies in creating user friendly, mobile first applications. Key strengths include logical thinking, my ability to analyse/troubleshoot issues and curiosity to learn.

Technical Skills

Front End

HTML5, CSS3, JavaScript, jQuery, Bootstrap, RESTful API, Moment.js

Back End

NodeJS, NPM, OOP, JSON, Express.js

Applications

GitHub, JIRA, Neto

Methodologies

Agile, Waterfall, Scrum

Education

Full Stack Development Bootcamp	Monash University	2021
Bachelor of Computer Science Engineering	Anna University	2010

Projects

Coffee Mate

The Coffee Morning App is designed for the user view during their morning coffee for their daily dose of internet goodness. Built with - HTML, CSS, JavaScript, Third party APIs

Weather Dashboard

A simple weather dashboard to display current weather of different cities including temperature, UV Index, wind speed and five-day weather forecasts. Built with - HTML, CSS, jQuery, Bootstrap, Moment.js, Open Weather - API

Experience

2021(May) – Present

Boutique Retailer

Content Creator

Currently working for the marketplace, creating product content to list on different channels and maintaining the product values and related activities in Maropost Commerce Cloud while learning the complexity of ecommerce behaviour.

2010-2012

Cognizant Technology Solutions

Test Analyst

Planned and executed testing activities in Test management tool, HP Quality Center. Developed test scenarios and detailed test cases based on business requirements. Logged and tracked the bugs in defect tracking tool, JIRA till closure. Performed tests for unit functionality, end to end, system integration and backend.
